

QUEST *for a* CURE

'Quest for a Cure: New Breakthroughs in Pancreatic Cancer Clinical Trials'

Wednesday, September 16, 2026 | 5 - 7 p.m. | Sullivan Conference Center
at the University of Hawai'i Cancer Center
701 Ilalo Street, Honolulu, HI 96813

Join us for a free public event focused on the latest breakthroughs in pancreatic cancer research.

Pancreatic cancer remains one of the most challenging cancers to treat, but a promising new drug, **daraxonrasib**, is offering renewed hope for patients with advanced disease.

This *Quest for a Cure* event will highlight this exciting breakthrough, with presentations by physicians from the University of Hawai'i Cancer Center who have played a direct role in advancing pancreatic cancer research. Among them, Dr. Elizabeth Nakasone will discuss the pivotal clinical trials that helped bring daraxonrasib to patients and explain what this breakthrough could mean for the future of pancreatic cancer treatment. And Dr. Jared Acoba will provide an update on the first-line pancreatic cancer clinical trial launching at The Queen's Medical Center and the continued expansion of innovative treatment options in Hawai'i.

Attendees will also hear firsthand from patients receiving daraxonrasib, as well as pancreatic cancer survivors and caregivers, whose personal experiences illustrate the impact of these advances. Join us for an inspiring evening of discovery, resilience and hope as we explore the latest innovations in pancreatic cancer research and clinical trials.

Speakers:

'Introduction to Clinical Trials'

Toshiaki Iwase, MD, PhD

*Medical Director,
Clinical Trials Office,
University of Hawai'i Cancer Center*

'Introduction to Pancreatic Cancer and QMC Trial'

Jared Acoba, MD

*Researcher
Translational and Clinical Research
University of Hawai'i Cancer Center*

'Daraxonrasib and Ho'ola Early Phase Clinical Research Center Connection'

Elizabeth S. Nakasone, MD, PhD

*Assistant Researcher
Translational and Clinical Research
University of Hawai'i Cancer Center*
